

Julien Garsia

Fullstack Developer

As a graduate student at Epitech Paris, I have acquired strong technical skills through my studies in computer science and software engineering.

These technical skills include proficiency in programming languages such as TypeScript, C++, Python, Golang as well as experience with software development frameworks and tools such as Github and Docker more details on my blog.

I am excited to apply my technical expertise in a permanent position as I conclude my studies, starting in March 2024.
